PROFILE

An adaptive Informatics Engineering student at Politeknik Caltex Riau with a strong foundation in software engineering and data analysis. Experienced in developing web applications using the PHP and JavaScript ecosystem, as well as processing and analyzing data with Python. Passionate about improving system efficiency and applying Artificial Intelligence, particularly Natural Language Processing (NLP) and Machine Learning (ML), to solve real-world business problems. Ready to contribute effectively in both software development and data analytics teams while continuously learning and adapting to new challenges.

SKILLS

Programming Languages	:	PHP, Python, JavaScript
Web & Software Development	:	Laravel, React.js, HTML, CSS
Data Processing & Analytics	:	Data Analysis, Machine Learning, Natural Language Processing (NLP)
Database Management	:	MySQL
Development Tools	:	Git, GitHub, VsCode, Google Colab, Jupyter
Language	:	English, Bahasa Indonesia

EDUCATION

Caltex Riau Polytechnic

2022 - Now

- D4 - Informatics Engineering

ORGANIZATIONAL EXPERIENCES

PMK Politeknik Caltex Riau

Field Coordinator – Christmas Celebration

Nov 2023 – Dec 2023

- Led and coordinated the field operations team to ensure all event activities were executed according to the planned schedule.
- Supervised on-site event operations and maintained effective coordination among committee members to ensure the event ran smoothly.

PCR Pelalawan Esports Tournament

Event Division Member 2023

Nov 2023 – Nov 2024

- Contributed to the planning of the tournament concept, event structure, and competition regulations for a regional-scale esports tournament.
- Collaborated with cross-functional teams to ensure smooth tournament management and technical broadcasting (live streaming) operations.

PROJECT EXPERIENCE

Public Sentiment Analysis System Using IndoBERT (Ongoing)

- Designed a Natural Language Processing (NLP) system for classifying public opinions on demonstrations using the IndoBERT transformer model.
- Conducted literature reviews on text preprocessing techniques and performed initial model development and experimentation using Python.

Flight Booking Web Application

- Developed a web-based flight reservation system using Laravel 11 and Filament to streamline administrative management.
- Designed and implemented a MySQL database to manage flight schedules, user transactions, seat reservations, and booking data efficiently.

Rental Inventory Management Application

- Developed a web-based inventory and rental management system using Laravel 11 as the primary backend framework.
- Integrated Filament Admin Panel to simplify inventory monitoring, rental tracking, and transaction

management.

CERTIFICATIONS

Dicoding Academy

2025 - 2026

- Introduction to Python Programming (*Certificate ID: EYX4K47Q5PDL*)
- Introduction to Artificial Intelligence (*Certificate ID: MEPJ2061LP3V*)
- Introduction to Cloud Computing and Generative AI on AWS (*Certificate ID: 07Z6J5G5JXQR*)

BuildWithAngga

2025

- Web Development with Laravel 11, Filament, and MySQL: Rental Inventory Application (*Credential ID: BJlIEccnUH*)
- Flight Booking Web Application with Laravel 11 and Filament (*Credential ID: 5gjYolclf8*)

IBM SkillsBuild (in collaboration with Pijak)

2026

- Introduction to Artificial Intelligence (*Credential ID: ALM-COURSE_4058918*)
- AI Ethics (*Credential ID: ALM-COURSE_4058927*)
- Introduction to Generative AI (*Credential ID: ALM-COURSE_4058859*)

Coding Camp powered by DBS Foundation & Dicoding

2026

- Introduction to Financial Literacy (*Certificate ID: JLX150095Z72*)
